Advent Wreath Assembly Instructions

If you would like to build an Advent Wreath for your home devotions, here is how you do it.

First, you need to purchase

- ✂ Floral Foam. This green sponge will ensure your wreath stays fresh through the season.
- ✂ 4 Blue Candles
- ✂ 1 Pink Candle
- ✂ 1 White Candle
- ✂ Any special trimming to beatify the wreath

Second, you will need to scavenge

- ✂ Cedar branches and other greenery
- ✂ Holly and berries
- ✂ Pinecones and other natural decor

Step 1

Soak the green floral foam in water for 10 minutes. Place the foam on a plate on in a bowl.

Step 2

Place the white candle in the centre of the foam. Push it right to the bottom so that it touches the plate.

Step 3

Place three blue candles and one pink candle around the white candle.

Step 4

Take some larger greenery pieces and poke them into the bottom of the floral foam around the entire base.

Step 5

Take smaller greenery pieces and place them a little higher up around the entire wreath. Keep adding greenery until the floral foam is camouflaged. **Be sure to avoid placing greenery too near the candle wicks.** Nestle any small greenery on top of the wreath in between the candles.

Step 6

Trim your wreath with ribbon, natural décor and any other decorations you like. **Be sure to avoid placing trimming too near the candle wicks.**

Step 7

Follow the simple prayer service each day. **Remember to extinguish the candles after your prayer service.**

Step 8

Remember to water your green floral foam regularly!
